

Group Project Proposal – CSC 4370/6370

=====

Group Members:

- Tanuska Biswakarma
- Caira Major

Project Summary:

- Selected topic track: [Track A: Recipe Studio](#)
- Extension pack: [Story Pack](#)
- Bonus feature(s), if any: [Users can save favorite recipes for later viewing.](#)
- [We are building a mobile-friendly website called Recipe Studio. Users can browse recipes, read ingredients and steps, and follow a special “Story Mode” that guides them through cooking step-by-step like a story. Our goal is to make the website clean, easy to read, and simple to use. Recipes will be organized clearly. The Story Mode will make cooking more fun by showing one step at a time with smooth transitions.](#)

Proposed Wireframe:

- Homepage:

[Purpose: Welcome users and provide navigation.](#)

[Details:](#)

- [Hero banner with app name and tagline.](#)
- [“Browse Recipes” call-to-action button.](#)
- [Featured recipe section.](#)
- [Navigation bar:](#)
 - [Home](#)
 - [Recipes](#)
 - [About](#)
 - [Contact](#)

[Navigation Flow:Homepage → Recipes List → Recipe Detail → Story Mode](#)

- Layout:

1. [Home](#)
2. [Recipes List](#)
3. [Recipe Detail](#)
4. [Story Mode](#)
5. [About](#)
6. [Contact](#)

- Each page details:

1. [Home](#)

- [Brief introduction.](#)
- [Featured recipe card.](#)
- [Quick navigation.](#)

2. [Recipes List](#)

- [Responsive card grid layout.](#)
- [Image, title, short description.](#)
- [Filter/search \(if added\).](#)

3. Recipe Detail

- Banner image.
- Ingredients list.
- Step-by-step instructions.

4. Story Mode

- Chapter-based progression (Step 1 → Step 2 → Step 3...).
- Animated transitions between sections.
- Progress indicator (visual step tracker).
- Next/Back navigation.

5. About

- Project description.
- Developer bios.

6. Contact

- Contacts
- Validation feedback

Functionality:

- Screen-to-screen transition use cases:

- Clicking a recipe card opens the Recipe Detail page.
- Clicking “Start Story Mode” opens a step-by-step view.
- Navigation bar links move between pages.

- Transition implementation details:

- Use CSS transitions for smooth page changes.
- Use fade-in or slide-in effects when opening pages.
- Buttons will have hover effects.

- Transformation implementation details:

- Recipe cards slightly grow on hover.

- Ingredient items can be checked off.
 - Story Mode switches from one step to the next.
- Animation implementation details
 - Smooth progress bar in Story Mode.
 - Subtle animations for buttons.
 - Bonus Feature:
 - Users can save and remove favorite recipes for later viewing
 - Favorite selections will be saved across sessions on the user's device.
 - Visual feedback shows when a recipe is saved or unsaved.

User Experience:

- Proposed use case(s) for each page:
 - The user browses recipes on the homepage.
 - The user selects a recipe from the list.
 - The user reads details and ingredients.
 - The user follows cooking steps in Story Mode.
- Accessibility notes (focus, contrast, reduced motion):
 - Clear font sizes and spacing.
 - Good color contrast for readability.
 - Keyboard navigation support.
 - Mobile-first responsive layout.

Test Cases:

- Usability test approach with peer feedback:
 - Ask classmates to test the website.
 - Observe how easily they navigate.
 - Collect feedback on design and clarity.
- Responsive test on multiple screen sizes:
 - Test on mobile.
 - Test on laptop.
 - Test on desktop.
- Validation plan for quality and consistency
 - Check for broken links
 - Test forms for correct input
 - Review layout consistency
 - Test in multiple browsers

Approach to Refine Improvements:

- How feedback will be incorporated:
 - Write down all feedback
 - Fix major usability issues first
 - Improve layout and readability
 - Adjust animations if needed
- Iteration plan across the 14-day development window:
 - Days 1–3: Plan layout and design

- Days 4–7: Build main pages
- Days 8–10: Add Story Mode and animations
- Days 11–12: Accessibility improvements
- Day 13: Testing and fixes
- Day 14: Final review and submission

Proposed APIs (if any):

- API name, purpose, and fallback plan if unavailable:

- [Recipe API to fetch recipe data](#)
- [Fallback plan: Use local JSON file with saved recipes if API is unavailable](#)

Signed Proposal Statement:

We acknowledge the conditions in this proposal, commit to active participation, and understand that individual grades may vary based on contribution and performance.
